HARDY HERBACEOUS and ALPINE PLANTS

NEW SPRING CAT NOT REA V LL BE MAILLE IN FEB.

TWENTIETH EDITION Autumn, 1925

The WAYSIDE GARDENS CO., MENTOR, OHIO

America's Greatest Producers of Hardy Perennials

WAYSIDE GARDENS

Mentor, Ohio

Twenty-five miles east of Cleveland, on the Cleveland-Painesville Road, at Stop 67, C. P. & E. Electric Line Telephone, Mentor 39-K Telephone, Painesville 702-W.

READ CAREFULLY

All of the stock offered is grown on our own grounds, that grown from cuttings and divisions we know to be clean and true. Plants grown from seeds are from seed stocks obtained from the most reliable sources.

OUR PLANTS ARE ALL FIELD GROWN, ARE GIVEN CONSTANT CARE AND CULTIVATION AND WHEN SENT OUT ARE STRONG AND WELL DEVELOPED, MUCH LARGER AND WORTH A GREAT DEAL MORE MONEY THAN POT-GROWN PLANTS.

We do not divide our plants before shipping but send the entire plant as dug. Divid-ing is only done in rare cases and only then because it is necessary to get the best results. If, after receiving, you are not satisfied with the quality of the stock, let us know

and we will replace anything you mention without charge or without question.

TERMS OF PAYMENT

Customers unknown to us will please send cash or references with their order. It is impossible for us to make immediate shipment to new clients who do not send references or cheque with their order. NOT SENDING REFERENCES OR EN-CLOSING CHEQUE CAUSES DELAY IN THE FORWARDING OF THE STOCK YOU ORDER.

GUARANTEES

We guarantee all stock furnished by us to be first-class, true to name, and larger than pot-grown plants, all of a size so as to give immediate results.

However, there are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond our control.

OUANTITIES ORDERED

We do not sell less than three plants of a kind unless offered otherwise; twenty-five plants are sold at hundred rate. Five hundred at thousand rate.

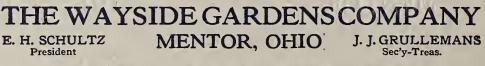

RISK

All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

SHIPPING DIRECTIONS

Please give explicit shipping directions, stating whether stock is to be shipped by freight or express, and by what route.

Small shipments can be sent by parcel post. All such shipments will be sent in-sured, insurance and postage to be paid by the customer.

Largest Growers of Hardy Plants in America

The Vogue of Old-Fashioned Hardy Flowers

ODAY, more than ever before, lovers of flowers everywhere, are seeking for their gardens the better forms of those Old-Fashioned Flowers of Grandmother's Days, many of which are indigenous to our soils, while other new and rare types continue to appear from various sources, both here and from foreign countries.

A PARTA

Maintaining our position as leading American growers of Hardy Herbaceous, Alpine and Rock Plants, we here present our 1926 Catalogue of what we believe

いた

Plants, we here present our 1926 Catalogue of what we believe to be the greatest and most representative collection of these classes ever produced by one single American concern.

Without arrogating to ourselves the credit of having originated many of these Perennial Garden Favorites, we pride ourselves on the magnificent quality and variety of our stock, the exceptional beauty and rareness of many, of which we are exclusive producers in this country, and lastly in the magnitude of our industry (the largest in this country), amply reflected in our 1925 returns, whereby close to four million plants left our grounds for points all over the U. S. A. and Canada.

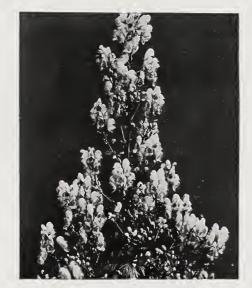

With such achievements behind us, we look forward to, and are splendidly prepared to meet even a greater demand in 1926 for our justly famous Wayside Gardens "Quality" Perennials.

(We will gladly give prospective customers references and information about our stocks and growing methods, we can also furnish names of leading American landscape architects who use our plants.)

WAYSIDE GARDENS CO. MENTOR, OHIO.

Achillea Ptarmica, "The Pearl."

Aconitum Fischeri.

The Lovely Aethionema.

| ACHILLEA (Milfoil or Yarrow). | | |

VARIOUS ANEMONES.

| Hupehensis (Early Anemone). Was | | | |
|---------------------------------------|------|------|-------|
| originally introduced from cen- | | | |
| tral China, is closely allied to Ane- | | | |
| mone japonica, which, in a minia- | | | |
| ture form, it resembles. The plant | | | |
| grows from 10 to 12 inches high | | | |
| and from early in August until | | | |
| late in Autumn; produces an abun- | | | |
| dance of flowers about 11/2 inches | | | |
| in diameter, of a pleasing mauve- | | | |
| rose | 1.00 | 3.00 | 20.00 |
| Pulsatilla (Pasque Flower). Grows | | | |
| from 9 to 12 inches high and pro- | | | |
| duces violet or purple flowers | | | |
| during April and May. An inter- | | | |
| esting plant for the rockery or | | | |
| well drained border | 1.00 | 3.00 | 20.00 |
| Pulsatilla rubra. Of dwarf habit | | | |
| with reddish purple flowers | 1.00 | 3.00 | 20.00 |
| Sylvestris. Fine for cool, moist cor- | | | |
| ner of rock garden or border. | | | |
| Large, white blossoms on nodding | | | |
| stems of about 12 inches. Very | | | |
| free blooming. May and June | 1.00 | 3.00 | 20.00 |
| | | | |

ARENARIA (Sandwort).

| Montana. A hardy perennial growing in close tufts, profusely covered with small, silvery white flowers which appear quite early in the season. Excellent as an edging plant in formal gardens. Suitable for rockeries in sunny places. Flowers resemble small, white, upturned morning glories Grandifora. From the Pyrenees Mountains. Covers itself with its pure, snow-white flowers. One of the best of all rock plants. May | | 3.00 | 20.00 |
|---|------|------|-------|
| ASCLEPIAS (Butterfly Weed). | | | |
| Tuberosa. Attractive native plants, flowering during July and August, and growing about 2½ feet high Umbels of bright orange colored flowers | .85 | 2.50 | 15.00 |
| ASPERULA (Woodruff). | | | |
| Odorata. 6 to 8 inches high May. Habit erect; leaves usually in a whorl of eight, finely toothed. In- creases rapidly and is used for carpeting shady places and for edgings. Heads of snowy white flowers. A fine, scented herb | 1.15 | 3.50 | 25.00 |
| ASPHODELUS (King's Spear). | | | |
| Luteus. Tall spikes of bright yel- low, lily-like flowers, very fra- grant, swordlike follage, fine for borders | 85 | 2.50 | 15.00 |
| DUITERS | .00 | 4.00 | 10.00 |

AQUILEGIA (Columbine).

As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose in strains reasonably true. Practically all the various shades and colors are in the Coerulea Hybrids. They re-main in bloom for a long season and are vigorous and long lived. They are not at all particular as to soil or location, although they prefer a sandy 1724n and a moist but well drained, sunny position, and usually make them-selves at home in any hardy border or rockery. Their period of flowering covers the late Spring and early Summer months. Taken as a whole, they are a most important part of the hardy garden, and should be grown in quantity by every lover of old-fashioned gar-den flowers.

ARMERIA (Sea Pink or Thrift).

Attractive dwarf plants that will succeed in any soil, forming evergreen tufts of bright green foliage, from which innumerable flowers appear in dense heads, on stiff, wiry stems, from 9 to 12 inches high. They flower more or less continuously from early Spring until late in the Fall. Very useful in the rockery and border edgings.

| Three Bee's Ruby (New). A wonderful free-blooming variety, bearing great quantities of rosy carmine flowers. 12 to 18 inches high. (Sold out for this season). | Doz. | 100 |

Armeria-Sea Thrift.

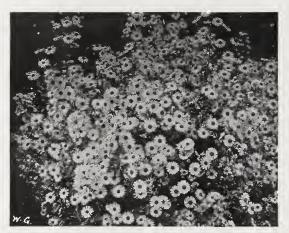

Arenaria Montana,

Artemisia Lactiflora.

Aster, Elta.

Aster, Novi-Belgi Climax.

Aster, Novi-Angliae.

HARDY ASTERS (Michaelmas Daisies). The many species, widely distinct from each other in habit and form, are, with a few exceptions, all native of North America. It is in Europe, however, that our Asters have been most highly appreciated. Many improvements have been made by European growers, and many hybrid forms have been produced by crossing the different species. For the best results, they require division and replanting every third year.

Campanula Latifolia.

CHRYSANTHEMUMS.

Hardy Chrysanthemums are undoubtedly one of the best of border plauts, coming in with a grand display of color and cut flowers when other plants are on the wane. In our estimation one cannot plant too many. From Sep-tember until frost one can literally gather armfuls from a seemingly inexhaustible supply.

HARDY OLD-FASHIONED VARIETIES Full Field-Grown Clumps-Not Divisions.

We collected from old gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; are very showy. 3 to 4 feet high. When in bloom are a perfect mass of flowers.

CHOICE NAMED VARIETIES

The varieties offered below comprise the choicest new hardy outdoor sorts, that need but a light covering to carry them through the Winter. We have chosen the earliest to bloom, so that the full enjoyment of these best-of-all Autumn flowers may be derived by those in northern territories where Winter comes early. Best results are obtained from pot-grown plants. Supplied from 2%-inch pots in Spring only.

Hardy Chrysanthemums.

Pompon Chrysanthemums.

Button Chrysanthemums.

Shasta Daisy, Mrs. C. Lowthian Bell.

Daisy, Glory of Wayside.

Daisy, Etoile d'Or.

CHRYSANTHEMUM MAXIMUM (Shasta Daisy).

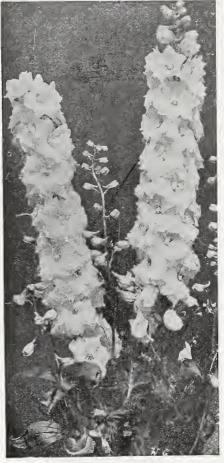

The improved varieties of Marguerite, all allied to the Shasta Daisy that adorns our fields in the Spring, are among the most useful of our garden flowers. Not only have these flowers been greatly improved in size and form, but there are now early and late blooming varieties which give a succession of long-stemmed flowers so valuable for vase decoration during four months of the year. Glory of Wayside is a variety worthy of atten-tion, and Etoile d'Or is robust and free-flowering. Mrs. C. Lowthian Bell has enormous flowers with strong stems. The Shasta Daisy has a yellow center with long, white petals, the slender stems springing from the base of the plant, and is most attractive either in the perennial border or as a cut flower. Common kinds like Alaska have been discontinued.

DELPHINIUM (Larkspur).

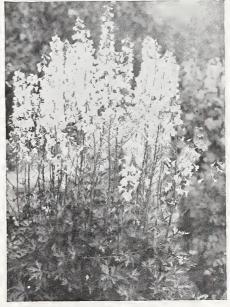

DELPHINIUM (Larkspur). English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. Some varieties grow 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long; in fact, they will bloom from Spring till Fall. The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in Summer the plants are not too forward, and that they be well watered if the weather is dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured, will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphin-ium is exceedingly fine. A succession of flowers may be expected from Spring to early Autumn, especially if the spikes, which have done flowering early, be cut down to the ground; fresh growth will then be produced which will give blossoms. Watering in Summer will increase size of on certain soils, instead of the bare surface of the ground Alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns will protect the plants from slugs through the Winter and Spring. Any garden soil suits the Del-phiniums. Three Doz. 100 phiniums.

GRASSES (Hardy Ornamental). The ornamental grasses can be used with telling effect in borders, large beds, or by the margin of ponds and lakes. They are often used with small shrubs and me-dium sized trees in wide borders. The Eulalias planted singly on lawns where the soil is deep and rich, take care of themselves and grow rapidly into large specimens. In large, round beds, with ornamental grasses as the princi-pal feature, the effect is heightened by the addition of such plants as Cannas or dwarf-flowering plants near the margin.

Hyacinthus Candicans.

HOLLYHOCKS (Althea Rosea).

HOLLYHOCKS (Althea Rosea). The Hollyhock is an old garden favorite, full of senti-ment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect, with elegant camellia-like flowers that form perfect rosettes of the most lovely shades of color. They require a deep, rich soil and a sunny corner, but will repay by their gorgeous and lavish bloom all the attention bestowed upon them. Painters choose Hollyhocks as subjects for floral paint-ings oftener than any other flower. We suppose the rea-son for this is that artists have a keener appreciation of beauty than other people, and recognize that the common single Hollyhock is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group of single Hollyhocks, and once planted they will literally take care of themselves even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be topheavy. Hollyhocks planted in the Fall will bloom the following summer. Summer.

| Double. Separate colors, red, ma- roon, white, yellow, pink, Newport pink, white with purple base, bright rose, dark purple, apple blossom, pale lihac | | 100 \$15.00 |

Iris Kaempferi-Japanese Iris.

Iris Pumila, Varieties.

Siberian Irises.

IRIS KAEMPFERI (Japanese Iris).

The magnificent Iris Kaempferi belong to the Apogons, and a field of them in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

Culture. The secret of success is to keep the ground well stirred, never allowing it to bake or become hard. Any good mellow clay loam will grow Japanese Irises to perfection, if well enriched. They like plenty of moisture during the growing season, but flooding with water is not a necessity, as many suppose. Water standing over the plants for a great length of time in Winter is fatal to them.

Time to Plant. Latter part of August to the beginning of October is the best time. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen, to prevent roots from being heaved out of ground by frost. In northern sections late planting had best be deferred until Spring.

IRIS GERMANICA (German or Flag Iris).

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it. It throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Plant in late August or early September preferably. Spring will do also.

Spring will do also. The roots offered in this list are from plants transplanted a year ago and are of a size large enough to bloom next Spring. The collection is up to date and consists of the best and newest standard varieties. Twenty-five roots at 100 rate, 250 roots of a kind at 1000 rate. We guarantee the usual Wayside Gardens quality. The letter "S" refers to the standards or upright petals; "F" the falls or drooping petals.

Choice New Introductions

- **Cecil Minturn** (New). Soft cattleyarose. A beautiful flower with broad petals, gracefully waved and crinkled; one of the finest Irises for size and extreme beauty ... Each, \$2.00
- Lord of June. S. lavender-blue; F. rich violet-purple. A magnificent variety of gigantic size Each, \$1.25 Mme. Chobant (Denis, 1916). 36
- Mme. Chobant (Denis, 1916). 36
 inches. A clover-scented Plicata
 type. Prussian-red with light
 brownish veins, on a pale chalce dony ground. One of the most
 beautiful of all Iris Each, \$1.50
- Queen Caterina (Sturt). A midseason variety of a beautiful clear orchid-purple veined with brilliant gold; the whole being further enhanced with a bright orange beard Each, \$2.00

General List of German Iris

Varieties marked with (*) have distinctive points of real merit, and are in our opinion the best of the moderate priced varieties.

LILIES (Hardy Garden Varieties)

ILIES (Hardy Garden Varieties). Noble and beautiful flowers which are too frequently strangers in American gardens. It is always with a touch of sadness that we note the infrequency of Lilies in American gardens. No flower, it seems to us, is at once so noble and so beautiful. Nor is there lack of va-riety. Furthermore, the Lily is singularly valuable for its charming effect on the skyline of the garden when in bloom bloom.

There is a notion that Lilies are "hard to grow." Some of the rarer species are, it is true; they not only stub-bornly refuse to make themselves at home in the garden, unless conditions are precisely to their liking, but some of them cannot endure the northern Winter without the necessary covering of litter, which many other tender plants require. Unless one goes in for Lilies to the ex-tent of making a hobby of them, however, these can all be left to the collector and there will be quite enough species remaining to give one a Lily season in the three months' duration of which loveliness follows loveliness for the reason that the Lilies in cultivation show an ex-ceptionally low percentage of horticultural varieties. Possibly because Nature made every species perfect to begin with, the hand of the hybridizer has been loath to endeavor to "paint the Lily," as it were.

The varieties which we offer in these three pages are such as have, with us, withstood the Summer's drought and the severest of Winters, and have thus proven them-selves worthy of a place in your garden.

DELIVERY—This depends upon the arrival of the bulbs from our foreign sources. Many get here too late for Autumn planting, thus necessitating carrying over the bulbs until Spring. Those marked (**) thus, should be planted in the Fall only; those marked (*) may be planted in Spring or Fall, preferably the latter; all the others are for Spring delivery.

| Ea Auratum (Golden-Banded Japan Lily). Undoubtedly one of the finest. Its large, graceful, fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded with chocolate- crimson spots and striped through the center a golden yellow; 3 to 5 feet. July to September. | ach | Do z . | 100 |
|--|--------------|---|--|

PAPAVER (Poppy).

PAPAVER (Poppy). Oriental Poppies are the regal representatives of this pop-ular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual and biennial kinds, and for a gorgeous display of rich and brilliant coloring noth-ing equals them during their period of flowering in May and June, and whether planted singly or in masses their large flowers and freedom of bloom render them con-spicuous in any position. They are of the easiest cul-ture; almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in the Fall or early Spring before the first of May—give them water occasionally during dry spells in the early part of the season. Mulch with stable litter in the Fall; and they will increase in size and floriferousness for several years. We offer the best of the latest introductions, as well as the distinct standard varieties.

PEONIES

PEONIES The varieties we offer are arranged alphabetically, and where known, the name and date of the introducer imme-diately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these sat-isfactory in any variety described, one naturally next looks for the character and habit of the plant. To fur-ther aid purchasers we shall be pleased to give by letter further information to intending purchasers. Figures following name indicate rating by American Peony Society. 3-Yr. Figures follov Peony Society. 3-5 Eyes Clumps Each Doz. Each Albert Crousse. 8.6. (Crousse, 1893). Very fresh salmon-pink, delicate color. Large, compact bomb shape; fragrant; erect; medium height. Late\$1.00 \$10.00 \$2.50 8.00 2.0015.00 3.50.... 1.25 12.00 3.00 Baroness Schroeder. 9.0. Rose type; late, White with shadings of flesh. This is one of the finest Peonies. Its immense flowers of great sub-stance with high chalice-shaped center are freely produced, lasting a long time. Very fragrant Claim Dubcie 5.7 Vory longe dow 2.50 4.5025.00**Claire Dubois.** 8.7. best in our collection. Midseason. 1.00 10.00 2.50 **NEW JAPANESE PEONIES** A type not very generally known, but in every community wherever established is awakening great interest and enthusiasm. The opened flowers are of extra wide spread, with one or more layers of broad guard petals which act as a cup to the mounded center. In place of the pollen-bearing stamens which center the Single Peony flowers, in this class the stamens and anthers are greatly en-larged into narrow, thick, twisted petaloids of various colors, forming a dense cushion. We heartily recommend our list to those who want some-thing different from the other fellow's; and to Peony planters generally, as types which will add zest and beauty to their gardens. Orders for the following booked now for September de-livery.

PLUMBAGO (Leadwort). 100 Three Doz. Larpentae. \$2.50 \$15.00 .85 2.5015.00 2.5015.00 .85 1.00 3.00 20.00 Multiforum major. Pendent sprays of greenish white flowers borne on long stems, 2 feet. May and June. A grand plant for a shady posi-tion, where it has plenty of room to show off its wonderful pendu-lous sprays of bells. Fine for cutting ting .85 2.5018.00 **Cashmeriana** (New). Large, globular heads of a pleasing purplish blue shade; prefers a moist shaded Veris Hybrids, This strain includes various shades of lilac, purple and violet, as well as a wide range of buff, orange, salmon and rich reds approaching scarlet in intensity. Quite hardy and of vigorous growth Vulgaris. The old English Prim-rose with pale yellow flowers PUINFILA (Self-hand: Hard all) .\$0.85 \$2.50 \$18.00 1.00 3,00 20.00 ... 1.35 4.0030.00 PRUNELLA (Self-head; Heal-all). Grandifiora. Violet or purple flow-ers all Summer. Fine for the rockery or slightly shaded parts of the hardy border. Succeeds in any soil not excessively dry ... 1.00 PYRETHRUM (Persian or Painted Daisy). 3.00 20.00 **The Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden.** They are perfectly hardy and absolutely invaluable for cut flowers through the Summer and early Fall. The flowers are bright and elegantly borne on long stems; most convenient for decoration. In form, the double varieties are somewhat aster- or chrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be designated Spring Chrysanthemums, possessing the advantage over the Chrysanthemums of being able to withstand the severest Winter without protection. The single-flowered varieties are variable colored Marguerites and possess a range of color and hardiness that Marguerites might envy in vain. Nothing can surpass the Pyrethrum profusion of flowers throughout the entire Summer from May to July, and the blossoms are not injured by storm or sun. As a cut flower, their long stems make them ideal for decorative purposes. Their position should be in the border or in beds. beds. Three 100 Doz. All Colors Mixed. Strong, 2-year \$3.00 \$20.00 2.5015.00 ering, bright golden yellow butter-cup; masses of flowers in May and Golden Glow. VIOLA (Tufted Pansy).

This is the best edging plant for the hardy border or garden; when properly cared for, these plants remain in full bloom from May until October. The great secret of their continuous bloom, though, is the fact that they must be sheared several times during the season, so that the flowers do not go to seed.

CORNUTA HYBRIDS. Three

Doz.

100

- Three **Jersey Gem** (New). Possesses the dwarf habit and continuity of blooming of the true horned Viola (V. cornuta), and the vigorous, bushy growth and roundish foli-age of the finest English bedding varieties. Color is pure, rich vio-let, and slightly perfumed. (Sold out for this season). **G. Wermig.** A variety of Tufted Pansy, forming clumps which are covered with rich, violet-blue flowers the entire season 1.00

BULBS FOR FALL PLANTING

In order to complete our service in furnishing hardy material for gardens, we are herewith offering an excellent selection of Imported Dutch Bulbs. Varieties most suitable for forcing are indicated by a star (*). We are doing this upon request of our customers who have been most insistent in their demand that we furnish them with bulbs of the same high quality as the plants we send out. We are able to give this service due to the fact that our secretary and treasurer, Mr. J. J. Grullemans is a son of the owner of the firm of J. J. Grullemans & Sons, Lisse, Holland, who are the second largest bulb growers in the world.

DARWIN TULIPS

| DARWIN TOLITS | | |
|--|--------------|----------------|
| The figure following the name indicates time of flowering. | the | relative |
| Baronne de la Tonnaye. 4. Bright rose, mar- gined blush rose. Height 26 inches | 10 \$0.55 | 100 \$ 4.50 |
| *Bartigon. A very showy, shapely flower of good substance on strong stem; fiery crimson with pure white base, broadly ringed deep blue. It is splendid for forcing. 28 inches | 1.15 | 9.00 |
| *Bleu Aimable. 4. Pale lavender, with white base, starred blue; beautiful flower of dis- tinct shape. Height 25 inches | 1.25 | 10.00 |
| Clara Butt. 4. Clear pink, flushed salmon- rose; inside much deeper, with blue base. beautiful out-of-doors. Height 21 inches | .75 | 4.50 |
| *Crepuscule. 3. Lilac-white, with dark rosy flush at tips of petals; large flower. Height 28 inches | 1.45 | 12.00 |
| * Dal Ongaro. 4. Pale lavender-violet; inside dark bluish violet with pure white base. Height 28 inches | | |
| * Dream. 2. Pale heliotrope, inside deep violet with blue base. Height 27 inches | .60 | 5.50 |
| *Europe. 2. Salmon-scarlet, shaded rose with white base; medium sized flower on strong stem. Height 22 inches | .65 | 5.50 |
| *Euterpe. 2. Silvery mauve-lilac, edged paler lilac, white base with blue halo; a long flower of exquisite color. Height 28 inches. | .60 | 5.00 |
| *Faust. 2. Dark purple-maroon with blue base very large flower. Height 30 inches | | |
| Feu Brilliant. 2. The most glorious scarlet Tulip ever raised, large and beautifully shaped flower on strong stem; one of the first to bloom. Height 28 inches | 1.00 | 8.00 |
| *Flamingo. 4. Soft shell-pink; medium sized flowers of refined form. Height 28 inches. | 1.00 | 8.00 |
| *La Candeur; syn., White Queen. 2. Almost white when mature; with black anthers; me- dium size. Height 24 inches | | 4.50 |
| *La Tulipe Noire. 3. Dark maroon-black the blackest of all the Tulips. Large flower. Height 25 inches | , .80 | 7.00 |
| *Madame Krelage. 2. Bright lilac-rose, mar- gined pale silvery rose; inside soft rose- pink; long flower. Height 28 inches | | 6.00 |
| *Margaret; syn., Gretchen. 3. Silvery pale rose, flushed white, inside soft pink with white base marked blue. Height 22 inches | .50 | 4.50 |
| *Massachusetts. 2. Vivid pink, edged rosy whitc, white base. Large flower of beautifu color. Height 26 inches | .70 | |
| *Mr. Farncombe Sanders. 2. Scarlet; inside vivid cerise-scarlet with white base; large Flower of perfect shape. One of the best among the reds. Height 25 inches | 1.00 | 7.00 |
| *Pride of Haarlem. 1. Brilliant rosy carmine with blue base; very large flower on tall strong stems; sweet scented. Unsurpassed for borders. Height 25 inches | e i | 5 5.50 |
| Painted Lady. 3. Creamy white, tinged sof heliotrope. Height 27 inches | t .55 | 4.50 |
| *Princess Elizabeth. 2. Clear deep pink changing with age to rose-pink, white base Large flower. Height 26 inches | . 1.1 | 5 9.00 |

| *Professor Rauwenhof, 3. Bright cherry-red | 10 | 100 |
|--|--------|---------|
| with scarlet glow inside; brilliant blue base. Enormous flower. Height 28 inches | | \$ 8.00 |
| *Reverend Ewbank. 2. Soft lavender-violet with silvery gray flush, white base; good sized flower of beautiful color. Height 2: inches | l 2 | 5.50 |
| *Sophrosyne. 2. Soft rosy lilac, edged silvery white; inside deep rose with dull blue base Height 29 inches | | 7.00 |
| * Viola. 2. Dark violet; strong, large flower | 1.25 | 10.00 |
| Fine Mixture of Darwins. As imported. Not to be compared with ordinary mixtures | | 5.00 |

NARCISSI FOR NATURALIZING

Naturalizing Daffodils, meaning planting them scattered irregularly in quantity, is a rare pleasure. They "bring sunshine into shady places" most delightfully. A lightly wooded bank or open meadow, covered with these golden flowers is a charming sight, as is a grove of white birches carpeted with them. A fairly good rule to follow is, the paler the Daffodil the more it enjoys the shade.

All varieties mixed, \$40.00 per case of thousand extra heavy bulbs.

\$375.00 per ten thousand bulbs.

Not less than 250 bulbs sold for \$10.00; 500 at \$20.00. All charges included except expressage from Mentor. Guaranteed to bloom profusely.

HYACINTHS

First size bulbs as listed below, \$2.50 per 10; \$20.00 per 100.

BLUSH WHITE

General Vetter. White, shaded blush, changing to pure white when in full bloom. Strong grower with large, well filled spikes.

LIGHT ROSE AND PINK

- General De Wet. Lively light pink with a lighter center; large trusses with good sized bells. Fine for forcing bedding. or
- Lady Derby. Beautiful, clear rose-pink, with large, con pact trusses. Early and fine for forcing and bedding. com-

LIGHT BLUE AND LILAC

- erle Brilliant. Light blue, tinged lavender; splendid spikes with large, substantial bells. A fine pot Hyacinth Perle Brilliant. and good for bedding.
- Queen of the Blues. Clear light porcelain-blue; a strong growing variety with large, well formed trusses. One of the best of its color, particularly for bedding.

PURE WHITE

La Grandesse. Pure white with fine, compact spikes. The best late forcing variety; fine for bedding as well. L'Innocence. This is the most satisfactory all-around pure white. Compact spikes with large bells. Does well in-doors and out.

RED AND DEEP ROSE

Gertrude. Deep rose-pink; compact spikes on good stems. A very popular forcing variety; also used for bedding. **La Victoire.** Shiny carmine-rose, with large, well filled spikes. A splendid bedding variety.

BLUE AND DARK BLUE

- rand Maitre. Deep blue with long, compact spikes of large bells, on strong stems. One of the most popular blues; fine for pots as well as bedding. Grand Maitre.
- **King of the Blues.** Dark violet-blue; splendid, large trusses. One of the best known blue Hyacinths. Good for late forcing and bedding.

YELLOW AND ORANGE

City of Haarlem. The finest of the yellows. Well formed trusses of orange-yellow bells. An excellent variety for forcing and bedding, Well formed

FEATHER AND GRAPE HYACINTHS

These will grow in any good garden soil, and are excel-lent for borders that are shaded by trees. They should be plantcd in large clumps, and be allowed to remain several years undisturbed. They are also well adapted for pot culture and for rockwork.

The Grape Hyacinth is a most interesting flower, per-fectly hardy, robust in habit, and admirably suited for the adornment of vases, for which purpose clumps should be planted in the reserve border.

FEATHER HYACINTHS - Muscari Plumosus

| Plumosus. Pretty pale mauve \dots \$0.50 | $ 100 \\ 4.50 $ |
|---|-------------------------|
| GRAPE HYACINTHS - Muscari Botryoides | 1000 |
| White Grape Hyacinth \$0.50 Light Blue Grape Hyacinth | \$ 4.00 |

| Heavenly Blue. | Immense heads of rich brigh | t | |
|----------------|-----------------------------|----|------|
| blue flowers. | Excellent for cutting | 40 | 3.50 |

ROMAN HYACINTHS

Splendid for early forcing. Can be had in bloom in December.

White. Selected\$1.25 \$10.00

ERANTHIS HYEMALIS (Winter Aconite).

| | 10 | 100 |

SNOWDROPS

One of the earliest flowers of Spring. They can be planted in borders or lawns. Flowers white. 10 100

Single\$0.40 \$3.00

Lilium Candidum

LILIUM CANDIDUM (Madonna Lily).

Choice Northern Grown. Arrive in August or September. The favorite Lily of the old-fashioned garden. Produces strong, stiff stems, studded with pure, glistening white flowers, that enliven the perennial flower garden and contrast beautifully with the green shrubbery of June, frequently growing 4½ feet high.

Plant some bulbs during September and October and enjoy a big crop of flowers next June; or put up, store in cold frame, and force for early Winter in the greenhouse or conservatory. Our bulbs of this splendid Lily are grown in Northern France, and are of the true, thickpetaled variety, which is much superior in habit and flowering qualities to that of the cheap, loose, southern grown bulbs. Our stock from the north of France is hardy and will live in your garden indefinitely.

| | | | | | | | | | | | | | | | | | | | 10 | 100 |

Our bulbs of this splendid white Lily are the finest that come to America and are much larger than those usually sent out. We supply the best bulbs only, from Northern France.

Planting Table for Plants and Bulbs

PLANTING. The table below shows the number of plants or bulbs required to fill a circular bed of the dimensions given. In planting begin at outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants or bulbs somewhat closer together in the two outer rows, giving more space between each plant or bulb toward the center of the bed.

| Diameter of | 6 in. | 12 in. | 18 in. | 24 in. | 30 in. | Diameter of | 6 in. | 12 in. | 18 in. | 24 in. | 30 in |

Special Announcement to Garden Clubs

DURING the past summer we have secured about two hundred colored lantern slides of the most popular hardy perennials for both border and rock gardens. While this does not embrace every class offered in our catalog, yet we hope to add to the collection so that by next year we will have a complete collection of slides showing the plants under actual growing conditions in our nursery.

Further, we are prepared to make arrangements with Mr. Shipman, of Willoughby, Ohio, who is a very keen naturalist and a wonderful photographer to show his collections of colored slides of birds and bird life and also wild flowers. Incidentally, we are indebted to Mr. Shipman for helping us in tinting our slides.

Garden Clubs interested in having these very instructive colored slides shown should write us for further information and conditions under which they may be obtained.

IMPORTANT

Last season we were very unfortunate in receiving seed of Sweet Williams which was not true to color. This we were not able to know until the plants bloomed.

If every customer who ordered Sweet Williams will let us know how many plants they bought from us which did not flower true to color, we will replace them without charge either this fall or in the spring of 1926.
